

## Corsa Security Platform

### for Automating and Scaling Virtual Firewalls

The Corsa Security platform is a turnkey solution that allows large enterprises, managed security service providers (MSSPs) and service providers (SPs) to replace physical firewalls with virtual ones and more easily scale threat protection at much lower total cost of ownership (TCO).

#### PUSH BUTTON, FIREWALL VIRTUALIZATION SHORTENS TIME TO DEPLOYMENT

**SPINNING UP A NEW FIREWALL IS AS "EASY AS THE CLOUD,"**  
since the IT or support team can quickly execute it.

**BUDGET-FRIENDLY, PAY-AS-YOU-GROW**  
business model so you only pay for the throughput you need.

**CUT AVERAGE PROVISIONING TIME AND COST PER EVENT**  
since all firewalls are controlled from the Corsa Security Orchestrator UI.

**DRIVE DOWN COSTS AND TRAINING NEEDS**  
by integrating with your security and operations tools.

#### About Corsa Security

Corsa Security is the leader in scaling network security with the first turnkey network security virtualization platform that simplifies how large enterprises and service providers expand traffic inspection, increase threat protection and automate firewall virtualization, at much lower total cost of ownership (TCO). By tightly integrating virtualization with intelligent orchestration, Corsa Security streamlines deployment, management and migration of virtualized next generation firewalls (NGFW) for zero-touch network security operations. Customers subscribe to the Corsa Security services based on their current needs and then pay as they grow while never having to deal with the infrastructure.

**Learn how Corsa is revolutionizing network security at [corsa.com](http://corsa.com).**

**100%**  
**READY TO DEPLOY**  
OUT OF THE BOX

**5X**  
**LOWER TCO**  
COMPARED TO  
DIY VIRTUALIZATION

INTEGRATED WITH  
**PALO ALTO NETWORKS**  
AND **FORTINET**

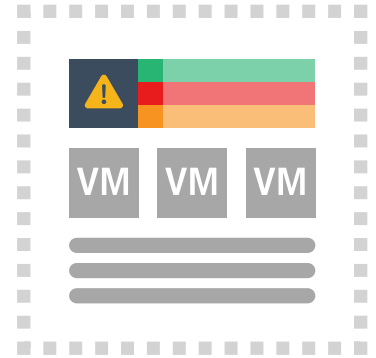

**READY FOR FUTURE  
SECURITY SERVICES**

# Advantages of Automated Virtualization with Corsa Security

The Corsa Security platform is extremely simple to use as we provide all the components in a turnkey package:

- Corsa Security Orchestrator manages firewall VM licenses, software upgrades and offers **zero-touch provisioning**
- Control all of your NGFWs from a single UI**, which is optimized for hands-free network security
- Platform is integrated with **best in class threat protection** from two Gartner leaders, Palo Alto Networks and Fortinet
- Pay-as-you-grow pricing model so you **only buy what you need** now

## Quick Virtual Firewall Deployment

Automated firewall deployment for push-button provisioning so anyone can execute

Bulk migration of physical firewalls including integration with policy and config management

Multi-tenancy, mix and match NGFW subscriptions and firewall vendors

Control virtual firewalls from the single Corsa Security Orchestrator UI

Manage budget as you transition from hardware to firewall VMs

## Flexible Firewall Licensing

The Corsa Security platform is an always evolving platform versus a point solution for firewall VMs

Single subscription covers hardware and software upgrades so hardware is "evergreened"

Pay-as-you-grow model is ideal for scaling firewall capacity and adding new security service as needed

License management from the Corsa Security Orchestrator UI and integration with new credit-based licensing from firewall vendors
