

Network Security Ecosystem Program

An Open and Collaborative Approach to Scaling Network Security

OVERVIEW

We don't believe that any one vendor or organization can address all the security issues for large enterprises and service providers. In fact, most customers mix and match from many vendors or rely on third parties to address their extensive security requirements.

That's why we developed the Corsa Network Security Ecosystem Program to encourage interoperability between security vendors, sharing of information with industry organizations, and to help our customers get support and guidance from like minded and local companies.

JOIN THESE INDUSTRY LEADERS

We recognize that the world of network security is huge and is constantly expanding. Here are some of our current partners.

To see our complete list of partners, visit: www.corsa.com/network-security-ecosystem

BENEFITS FOR OUR CUSTOMERS

We want our customers to rest assured that a best in breed approach will deliver what they need without compromise.

Simpler Security

Our platform offers a push-button approach to network security virtualization so you can easily deploy and scale unlimited virtual NGFWs.

Streamlined Operations

Through intelligent orchestration and tight integration with our partners, you no longer have to deal with the infrastructure.

Global Expertise

Our partners from around the world are a key part of of the Corsa team and are viewed as trusted advisers to our customers.

About Corsa

Corsa Security is the leader in scaling network security with the first turnkey network security virtualization platform that simplifies how large enterprises and service providers scale traffic inspection, including SSL/TLS encrypted, at much lower total cost of ownership (TCO). By tightly integrating virtualization with intelligent orchestration, Corsa streamlines deployment, management and operations of virtualized next generation firewall (NGFW) arrays for large networks. Customers subscribe to the Corsa Red Armor service based on their traffic inspection capacity needs and then pay as they grow while never having to deal with the infrastructure. Learn how Corsa is revolutionizing network security at corsa.com.

NETWORK SECURITY ECOSYSTEM PROGRAM LEVELS

The cornerstone of the program is the assurance customers get that key security functions have been integrated, tested and certified to work with the Corsa platform. The Network Security Ecosystem also includes different partnership types for resellers, industry associations, and providers of IT and managed security services.

LEVELS	DESCRIPTION
Corsa Certified	Technical partnerships and alliances with security companies that provide key functions like next generation firewalls (NGFWs), SSL visibility, intrusion prevention and more, which have been integrated and certified to work on the Corsa platform.
Corsa Channel	Leading value-added resellers (VARs) and distributors who are trained to deliver and support the Corsa platform, making it accessible in a range of locations and markets.
Corsa Associate	IT consultants and professional services organizations that refer their clients to Corsa when they see organizations struggling to solve issues, such as the SSL Inspection gap or scaling their firewall, which Corsa can solve.
Corsa Secured	Cloud and managed security service providers (MSSPs) who leverage the Corsa platform to better protect their customers' networks.
Corsa Unite	Alliances with industry organizations to develop better security solutions and share resources and information.

WHY BECOME A PARTNER?

Corsa is transforming network security with its turnkey network security virtualization platform that scales traffic inspection for 100% visibility and better ROI compared to existing approaches.

Innovative Solution

We have developed the first turnkey network security virtualization which provides a unique approach to scaling virtual firewalls quickly and easily.

Trusted Advisor

We see our partners as part of the Corsa team and view them as trusted advisers to clients. That's why we invest in these relationships to ensure mutual benefits.

Information Sharing

Our partners receive training, notification of product announcements, and other security insights. All of this to help our partners be as knowledgeable as possible.
