

Corsa Security Platform for Automating FWaaS

Automate your Firewall Virtualization

The Corsa Security Platform for Automating Firewall-as-a-service (FWaaS) is a turnkey virtualization solution that allows managed security service providers (MSSPs) and service providers (SPs) to offer a virtualized FWaaS that replaces their customers physical firewalls.

Secure access secure edge (SASE) FWaaS framework for MSSPs/SPs

SIMPLIFY THE VIRTUALIZATION OF HARDWARE FIREWALLS

Push button provisioning to deploy the service

Fully integrated with the firewall licensing and policy management

Managed through centralized Corsa Security Orchestrator

QUICKLY SCALE SERVICE OFFERINGS

Supports multi-tenancy

Offer specific services and capacity to individual customers

Integrates with monitoring, billing, CRM and inventory tools

REDUCE NETWORK OPERATIONS EXPENSES FOR BETTER ROI

Eliminates the need for DevOps skills

Low cost of entry

Pay-as-you-grow model

About Corsa Security

Corsa Security is the leader in scaling network security with the first turnkey network security virtualization platform that simplifies how large enterprises and service providers expand traffic inspection, increase threat protection and automate firewall virtualization, at much lower total cost of ownership (TCO). By tightly integrating virtualization with intelligent orchestration, Corsa Security streamlines deployment, management and migration of virtualized next generation firewalls (NGFW) for zero-touch network security operations. Customers subscribe to the Corsa Security services based on their current needs and then pay as they grow while never having to deal with the infrastructure.

How automating firewall virtualization works

The Corsa Security Platform for Automating FWaaS leverages a SASE framework to enable MSSPs to offer a fully virtualized FWaaS. Unlike complicated hardware deployments or do-it-yourself (DIY) virtualization projects, the platform offers zero touch operations for migrating physical firewalls to virtual ones with a pay-as-you-grow model. The platform includes the Corsa Security Orchestrator, hypervisor, and server delivered as a ready-to-deploy service.

SINGLE UNIFYING DASHBOARD

Are VMs running hot?
Do you need to add more?

Overall health status of the platform in one quick view

Plan when to add more resources to the platform based on what is allocated to your VMs

SERVER NAME	STATUS	CPU (AVG)	BW (TOTAL)
Server01			
VM01	Palo Alto	OK	84% 600 Mbps
VM02	Fortinet	OK	78% 587 Mbps
VM03	Offline	0%	0 Mbps

Heads up on the status of VMs and licensing as conditions change
